PETER FALASE

IT & DIGITAL OPERATIONS PROFESSIONAL | SYSTEMS, AUTOMATION & TECHNICAL PROJECT COORDINATION

Abuja, Nigeria | +234 802 908 5195 | pafalase@gmail.com

PROFESSIONAL SUMMARY

Technology-focused IT and digital operations professional with experience supporting business operations, IT infrastructure, workflow digitization, technical documentation and project coordination across sports, construction and corporate environments. Hands-on experience building and improving internal systems, coordinating cross-functional work, managing workplace technology and translating operational needs into clear digital processes. Combines an engineering background with web development experience and ongoing professional development in AI/LLM engineering, cloud systems and DevOps.

CORE SKILLS

IT Operations & User Support	Digital Workflow & Process Improvement	Technical Project Coordination
Web Applications & Internal Tools	IT Asset / Vendor Coordination	Technical Documentation & Reporting
Network & Hardware Troubleshooting	Stakeholder Communication	Business Systems Implementation

PROFESSIONAL EXPERIENCE

IT & Digital Operations Lead | Monoliza Sport & Recreational Center

2024 - Present

- Manage day-to-day IT operations, workplace technology, printers, network connectivity and hardware troubleshooting to support uninterrupted business operations.
- Design and improve digital workflows for membership registration, facility booking, invoicing, tournament administration and operational reporting.
- Develop internal tools and structured processes that replace ad-hoc manual work with clearer, repeatable workflows and better information visibility.
- Coordinate technology-related requirements across management, finance, marketing and operations, translating business needs into practical system improvements.
- Maintain IT assets and support procurement, repairs, vendor coordination and technology-related cost documentation.
- Create executive reports, SOP-style documentation, templates and administrative systems used for operational decision-making and staff coordination.

IT & Project Coordination Officer | Threemplus Integrated Enterprises Ltd

2024 - Present

- Support digital reporting, document control and coordination activities for construction and infrastructure-related work.
- Prepare and organize technical, bid, proposal, compliance and project documentation for internal and external use.
- Build structured tracking workflows for outsourced work, equipment records, project information and management reporting.
- Coordinate IT procurement, equipment inventory reviews, digital asset organization and workplace technology support.
- Support website modernization and improve the structure, accessibility and consistency of company digital information.
- Liaise across technical, finance and executive teams to keep project information, requests and documentation aligned.

Web Developer / Project Lead | Freelance & Contract Roles

2021 - 2023

- Built responsive websites and web applications for organizations, translating requirements into usable digital products.
- Implemented front-end interfaces, database-backed features, authentication and management dashboards.
- Coordinated project scope, timelines, client communication and delivery for small technical projects.

Administrative Coordinator / Supervisor | Network Energy Development Company

2018 - 2020

- Supervised daily operational activities, staff task allocation and administrative follow-through.
- Managed invoicing, documentation and recurring operational reports, improving consistency of weekly reporting.

Utility & Technical Operations Officer | Green Acres Boarding School

2017

- Supported generator, solar and electrical infrastructure operations, including maintenance scheduling and repair coordination.
- Helped maintain continuity of essential power systems through preventive maintenance and timely issue escalation.

TECHNICAL SKILLS

Development: JavaScript, HTML, CSS, Next.js, PostgreSQL, Supabase (Auth & Database)
Tools & Platforms: Git, GitHub, Microsoft Office, Google Workspace
Current Professional Development: AI/LLM engineering, RAG concepts, AI-assisted development, cloud architecture, DevOps fundamentals, Docker/Linux concepts, system design and business process automation

EDUCATION

B.Tech (Hons) - Engineering | Ladoke Akintola University of Technology (LAUTECH)

PROFESSIONAL MEMBERSHIPS

Graduate Member - Nigerian Society of Engineers (NSE) | Graduate Member - Nigerian Institution of Mechanical Engineers (NiMechE)
